Click [here](#) to see ISW's interactive map of the Russian invasion of Ukraine. This map is updated daily alongside the static maps present in this report.

The UK Ministry of Defense assesses that the Kremlin’s continued framing of its invasion of Ukraine as a “special military operation” rather than a war is actively hindering Russian force generation capabilities. The UK Ministry of Defense reported on June 19 that Russian authorities are struggling to find legal means to punish military dissenters and those who refuse to mobilize because the classification of the conflict in Ukraine as a “special military operation” precludes legal punitive measures that could be employed during a formal war. ISW has previously assessed that the Kremlin’s framing of the war as a “special operation” is compounding consistent issues with poor perceptions of Russian military leadership among Russian nationalists, problems with paying troops, lack of available forces, and unclear objectives among Russian forces. The Kremlin is continuing to attempt to fight a major and grinding war in Ukraine with forces assembled for what the Kremlin incorrectly assumed would be a short invasion against token Ukrainian resistance. The Kremlin continues to struggle to correct this fundamental flaw in its “special military operation.”

Russian authorities likely seek to use war crimes trials against captured Ukrainian servicemen, particularly troops that defended Mariupol, to advance its narratives around the war. Russian sources reported that the authorities of the Donetsk People’s Republic (DNR) plan to hold war crimes tribunals until the end of August 2022 and that at least one of these tribunals will be held in Mariupol. These tribunals will reportedly be judged in accordance with DNR legislation (which notably allows capital punishment, unlike Russian law) and be modeled on the Nuremberg format for war crimes trials. The trials are a sham attempt to try lawful prisoners of war as war criminals and support the Kremlin’s false framing of its unprovoked invasion of Ukraine as a “de-Nazification” operation. Despite the fact that DNR authorities plan to try Ukrainian servicemen in the DNR, a source in Russian law enforcement told state-owned media outlet TASS that the deputy commander of the Azov Regiment and the commander of the Ukrainian 36th Marine Brigade will both be transferred to Russia for investigation and trial. Russian authorities will likely use these trials to strengthen legal controls of occupied areas and further demoralize Ukrainian defenders by setting a harsh legal precedent during preliminary tribunals, as well as advancing the Kremlin’s false narrative of invading Ukraine to “de-Nazify” it.

Key Takeaways
- Concentrated Russian artillery power paired with likely understrength infantry units remains insufficient to enable Russian advances within Severodonetsk.
- Russian forces continued to prepare to advance on Slovyansk from southeast of Izyum and west of Lyman.
- Russian forces are focusing on strengthening defensive positions along the Southern Axis due to recent successful Ukrainian counterattacks along the Kherson-Mykolaiv Oblast border.
- Successful Ukrainian counterattacks in the Zaporizhia area are forcing Russian forces to rush reinforcements to this weakened sector of the front line.
• Russian forces are likely conducting false-flag artillery attacks against Russian-held territory to dissuade Ukrainian sentiment and encourage the mobilization of proxy forces.
Assessed Control of Terrain in Ukraine and Main Russian Maneuver Axes as of June 19, 2022, 3:00 PM ET

- Significant Fighting in the Past 24 Hours
- Russian-controlled Ukrainian Territory before February 24
- Assessed Russian Advances in Ukraine*
- Assessed Russian-controlled Ukrainian Territory
- Claimed Ukrainian Counteroffensives
- Reported Ukrainian Partisan Warfare
- Claimed Russian Control over Ukrainian Territory

* Assessed Russian advances are areas where ISW assesses Russian forces have operated in or launched attacks against but do not control.
We do not report in detail on Russian war crimes because those activities are well-covered in Western media and do not directly affect the military operations we are assessing and forecasting. We will continue to evaluate and report on the effects of these criminal activities on the Ukrainian military and population and specifically on combat in Ukrainian urban areas. We utterly condemn these Russian violations of the laws of armed conflict, Geneva Conventions, and humanity even though we do not describe them in these reports.

- Main Effort—Eastern Ukraine (comprised of one subordinate and three supporting efforts);
- Subordinate Main Effort—Encirclement of Ukrainian troops in the cauldron between Izyum and Donetsk and Luhansk oblasts
- Supporting Effort 1—Kharkiv City;
- Supporting Effort 2—Southern Axis;
- Activities in Russian-occupied Areas

**Main Effort—Eastern Ukraine**

**Subordinate Main Effort—Southern Kharkiv, Donetsk, Luhansk Oblasts (Russian objective: Encircle Ukrainian forces in Eastern Ukraine and capture the entirety of Donetsk and Luhansk oblasts, the claimed territory of Russia’s proxies in Donbas)**

Concentrated Russian artillery power paired with likely understrength infantry units remains insufficient to enable Russian advances within Severodonetsk, as Russian troops continued to fight for control of the city but made few gains on June 19. Russian forces continued efforts to encircle the remaining Ukrainian troops in the Azot industrial plant. Russian Telegram channels additionally claimed that Russian forces are advancing on Lysychansk from the south and fighting in Berestove, Spirne, Vovcharyavka, and the Lysychansk Oil Refinery. Russian troops conducted airstrikes around Severodonetsk and Lysychansk and strengthened their grouping to the south of the area around Orikhove and Toshkivka. Russian forces likely seek to levy their attempts to interdict the T1302 Bakhmut-Lysychansk highway to support offensive operations in Lysychansk.
Assessed Control of Terrain Around Luhansks as of June 19, 2022, 3:00 PM ET

Russian sources claimed control over Dolyna on June 15.

Russian forces claimed control over Toshkivka on June 12.

Russian forces conducted a partially successful attack on Komshuvakha on June 9.

Ukrainian officials reported that

Russian source Rybar claimed that Ukrainian forces established a crossing over the Severskyi Donets River near Protopopivka and Petrivske on June 6.

Russian sources claimed Russian forces reached Krasnohorvka and Kamenka in Donetsk Oblast on June 6.

* Assessed Russian advances are areas where ISW assesses Russian forces have operated in or launched attacks against but do not control.
Russian forces continued to prepare for offensive operations toward Slovyansk from southeast of Izyum and west of Lyman but did not make any confirmed advances in either direction on June 19. Russian forces conducted reconnaissance and artillery strikes against Ukrainian positions southeast of Izyum around Dibrove, Virmopillya, Kurulka, Bohorodychne, and Dolyna, as well as to the west of Lyman.7

Russian forces continued offensive operations to the east of Bakhmut to interdict Ukrainian lines of communication along the T1302 Bakhmut-Lysychansk highway on June 19. Russian forces reportedly fought around Nyrkove, Mykolaivka, and Berestove and conducted air, artillery, and missile strikes against Ukrainian positions east of Bakhmut and near the T1302.8 Russian forces will likely continue efforts to gain access to the T1302 in order to support operations in Severodonetsk and Lysychansk, especially as fighting in the area has largely stalled and Russian forces are increasingly unable to consolidate control of the city, even with artillery superiority.
Assessed Control of Terrain Around Severodonetsk as of June 19, 2022, 3:00 PM ET

Russian forces claimed control over all of Severodonetsk except the city's industrial zone on June 16.

All three road bridges connecting Severodonetsk and Lysychansk are destroyed as of June 13.

Ukrainian officials reported that Russian forces conducted a partially successful attack on Komyshuvakha on June 9.

Russian sources claimed Russian control over Novoluanske on June 16.

* Assessed Russian advances are areas where ISW assesses Russian forces have operated in or launched attacks against but do not control.

Note: We recessed old Russian claims about the capture of Zolote that Russian sources stopped reporting to enhance the clarity of the map.
Supporting Effort #1—Kharkiv City (Russian objective: Withdraw forces to the north and defend ground lines of communication (GLOCs) to Izyum)

Russian forces focused on maintaining their occupied frontiers north of Kharkiv City and fired at Ukrainian positions in northern Kharkiv Oblast on June 19. The Ukrainian General Staff reported that Russian troops unsuccessfully attempted reconnaissance-in-force operations in Rubizhne (in Kharkiv, not Luhansk Oblast), and Russian forces are likely fighting for more advantageous positions along the entire frontline north of Kharkiv City. Russian forces additionally continued artillery strikes on Kharkiv City and surrounding settlements.
Assessed Control of Terrain Around Kharkiv as of June 19, 2022, 3:00 PM ET

Ukrainian sources reported that Ukrainian Forces repelled Russian forces from Rubizhne on June 17.

Russian sources claimed control over Dolya on June 15.

Russian source Rybar claimed that Ukrainian forces established a crossing over the Seversky Donets River near Protopenkove and Petrivske on June 15.

Russian-controlled Ukrainian Territory before February 24

Assessed Russian Advances in Ukraine*

Assessed Russian-controlled Ukrainian Territory

Claimed Russian Control over Ukrainian Territory

Claimed Ukrainian Counteroffensives

Reported Ukrainian Partisan Warfare

* Assessed Russian advances are areas where ISW assesses Russian forces have operated in or launched attacks against but do not control.

Note: ISW is unable to verify Russian reports that Ukrainian forces crossed the Pechenihy Reservoir, established positions in Khromy in late May, and are operating on the road spanning Primorskoye - Martovoye - Peshchornojuv - Khromy as of June 2. Russian millblogger Rybar reported on June 13 that Ukrainian forces continued trying to establish a crossing on the eastern shore of the Pechenihy Reservoir. We will not advance Ukrainian counteroffensives until we observe corroborating evidence.
Supporting Effort #2—Southern Axis (Objective: Defend Kherson and Zaporizhia Oblasts against Ukrainian counterattacks)

Recent Ukrainian counterattacks have forced Russian troops to focus on maintaining their defensive positions along the Southern Axis on June 19.\textsuperscript{11} The Ukrainian General Staff reported that Russian forces in Kherson Oblast are strengthening their air-defense systems in the area, likely in response to continual, successful Ukrainian aviation attacks against Russian forces south of Davydiv Brid.\textsuperscript{12} Mayor of Melitopol Ivan Fedorov claimed that Ukrainian troops are approaching the Kherson Oblast.\textsuperscript{13} While ISW cannot independently confirm the current positions of Ukrainian troops, it is likely that localized Ukrainian counterattacks continue to push back Russian forces, especially along the Kherson-Mykolaiv Oblast border, and Ukrainian forces may be able to further threaten Kherson City in the coming weeks.

Russian forces are continuing to accumulate equipment and manpower in central Zaporizhia Oblast, specifically along the Dniprorudne-Vasylivka-Orikhiv line, likely in response to Ukrainian counterattacks.\textsuperscript{14} Fedorov stated that Ukrainian forces pushed the Zaporizhia Oblast frontline 10 km south. Ukrainian officials have previously reported that the Zaporizhia frontline shifted five to seven kilometers south and it is unclear whether Ukrainian forces have advanced 10 km in total or in addition to these earlier advances. Ukraine’s Zaporizhia Regional Military Administration stated that Russian troops are moving equipment and vehicles from Crimea through Melitopol toward the Vasylivka and Polohy areas and that Russian sabotage groups clashed with Ukrainian troops near the Zaporizhia-Donetsk Oblast border on June 19.\textsuperscript{15} Russian forces are likely accumulating troops in Zaporizhia Oblast to defend against ongoing Ukrainian counterattacks towards Melitopol that could threaten Russian control of the city.

Russian forces continued missile and artillery strikes against various locations in Kherson, Zaporizhia, Dnipropetrovsk, Mykolaiv, and Odesa Oblasts.\textsuperscript{16} Although Ukrainian air defense intercepted missiles before they struck Odesa directly, Ukraine’s Southern Operational Command noted that Russian forces likely targeted Odesa and other areas that are not experiencing direct hostilities to exert psychological pressure on the population and undermine local economies.\textsuperscript{17} Ukraine’s Southern Operational Command additionally reported that Russian forces are restructuring their naval grouping to include more submarines, which is a likely response to successful Ukrainian attacks on Russian naval assets in the Black Sea.\textsuperscript{18}
Assessed Control of Terrain Around Kherson and Mykolaiv as of June 19, 2022, 3:00 PM ET

Ukrainian officials claimed that Ukrainian forces advanced 5 kilometers east from Tavriiske on June 14.

Ukrainian forces confirmed they captured Sukhyi Stavok on June 5.

Geolocated combat footage from early June shows Russian forces still operating in these vicinities. Russian forces do not control this territory as of this publication.

Note: ISW is unable to independently verify conflicting reports about the status of the Ukrainian bridgehead near Davydov Brid as of June 19. The Ukrainian Southern Operational Command reported on June 19 that Ukrainian aviation launched air strikes on Davydov Brid and Snihurivka, indicating that Russian units remain in the Davydov Brid area. The Ukrainian General Staff reported on June 13 that Russian forces conducted UAV reconnaissance in the area of Davydov Brid to clarify Ukrainian positions, indicating a continued Ukrainian presence near Davydov Brid. Combat footage of Ukrainian forces shelling Russian positions near Lozove and Andriivka released on June 17 was likely recorded on an earlier date. Melitopol Mayor Ivan Fedorov also claimed that Ukrainian forces made unspecified advances towards Kherson City on June 19. We will update our maps as we collect and confirm more information.
Activity in Russian-occupied Areas (Russian objective: consolidate administrative control of occupied areas; set conditions for potential annexation into the Russian Federation or some other future political arrangement of Moscow’s choosing)

Russian forces are likely employing false-flag artillery strikes against infrastructure in Russian-held areas of Donetsk Oblast in order to dissuade pro-Ukrainian sentiment and encourage the mobilization of proxy forces. Open-source Twitter accounts confirmed ISW’s previous assessment that artillery attacks against Donetsk City were likely conducted from within Russian-held territory, refuting accusations made by Russian authorities that blamed Ukrainian troops for the attacks. Such false-flag attacks are likely being propagated by Russian authorities to create hostility to the Ukrainian military.
